sign of solutions

Heavy transport and lifting: precision works involving high value heavy constructions. Wagenborg Nedlift is the specialist in heavy transport, lifting and rigging services for decades. Skilled and experienced, customer-focused and committed.

Wagenborg Nedlift has operations local and abroad for clients in the oil and gas, as well as the petrochemical industry, within the energy, construction and infrastructure sectors.

SIGN OF SOLUTIONS

Wagenborg Nedlift is well known as a high-quality, customer-focused expert providing safe and efficient solutions in lifting, heavy transport and rigging services.

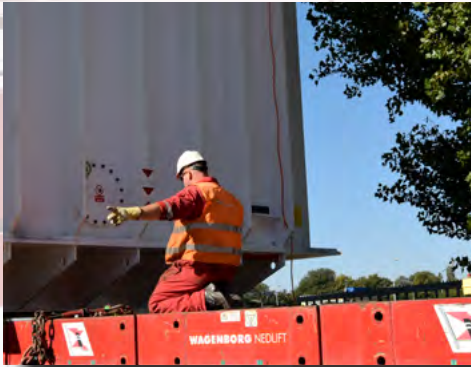

Wagenborg Nedlift teams up with their customers, taking on complex challenges with even more efficiency and safety!

Our strategic pillars:

- **Safety - zero accidents**
- **Customer proactive focus**
- **Highly skilled and experienced team**
- **State of the art equipment**
- **Efficient work flows**
- **Financially sound**

ESTA
winner

Location	Geleen (NL)
Load	150 t drying tower
Equipment	400 t crawler crane

Location	Arnhem (NL)
Load	4 x 800 kV transformers
Equipment	12 axle lines SPMT, 2 x 400 t telescopic cranes, barge, self erecting mobile tower crane

Location	Fredericia (DK)
Load	8 x LPG bullets, 325,5 t
Equipment	2 x 16 axle lines SPMT, 2 x 350/ 400 t crawler cranes

SAFETY FIRST

Safety: no incidents

Safety is the most important issue of Wagenborg Nedlift. Safety first. Always and ever.

Wagenborg Nedlift stands for safe execution of work without compromise. Making sure that each and every employee arrives back home safely.

Safety first

HSEQ

The key priority of Wagenborg Nedlift is safety: no accidents. In order to achieve this goal, Wagenborg Nedlift is a.o. committed to:

- High safety awareness
- Training and education
- Healthy working conditions
- Safe and certified equipment
- Focus on environmental care
- Continuous improvement

Certificates

Wagenborg Nedlift is certified according to:

- ISO 9001
- ISO 14001
- ISO 45001
- VCA-P

CRAFTSMANSHIP & TEAM WORK

The Bøkfjord Bridge was transported by sea from Wilhelmshaven (DE) to Kirkenes (NO) by Wagenborg Nedlift in cooperation with Wagenborg Towage. A journey of more than 3.000 km! The bridge connects Norway and Russia by road E105.

At Wilhelmshaven the bridge was driven onto the barge using 48 axis lines SPMT. Once in Kirkenes the bridge was jacked up to the right height.

The SPMTs revolved the bridge on the pontoon and placed it on to the foundations, making use of the tide.

Location	Kirkenes (NO)
Load	760 t Bøkfjord Bridge
Equipment	48 axle lines SPMT, Wagenborg Barge 8 and tug boat

SUSTAINABILITY AND

CSR

Wagenborg Nedlift considers corporate social responsibility important and accordingly deals with it:

- **Finding Solutions**
Efficient energy consumption
- **Taking Responsibility**
Reducing CO2 emissions
- **Seeking Opportunities**
Search for and use of renewable energy
- **Embracing People**
Enhancing personnel diversity
- **Choosing Technology**
Making responsible equipment choices

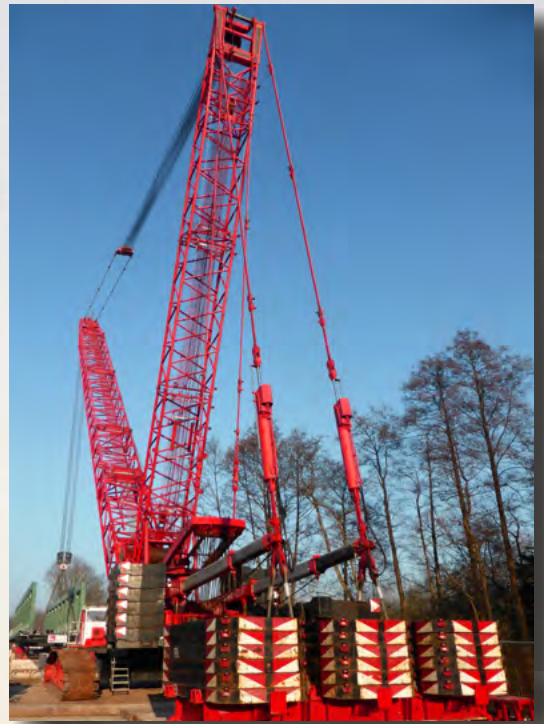

A to Z LOGISTIC SOLUTIONS

This 53 metre long railway bridge was put into place combining the power of a 400 t crawler crane, a 60 metre long skidding system and hydraulic jacks.

The bridge was skidded forward as far as possible to the opposite river bank until within the radius of the crawler crane. The bridge was placed onto foundations by jacking it down on one and using the crawler crane on the other end.

Location	Bremervörde (DE)
Load	280 t railway bridge
Equipment	400 t crawler crane, skidding system and hydraulic climbing jacks

Location Groningen (NL)
Load Steel construction components
Equipment Compact crawler crane

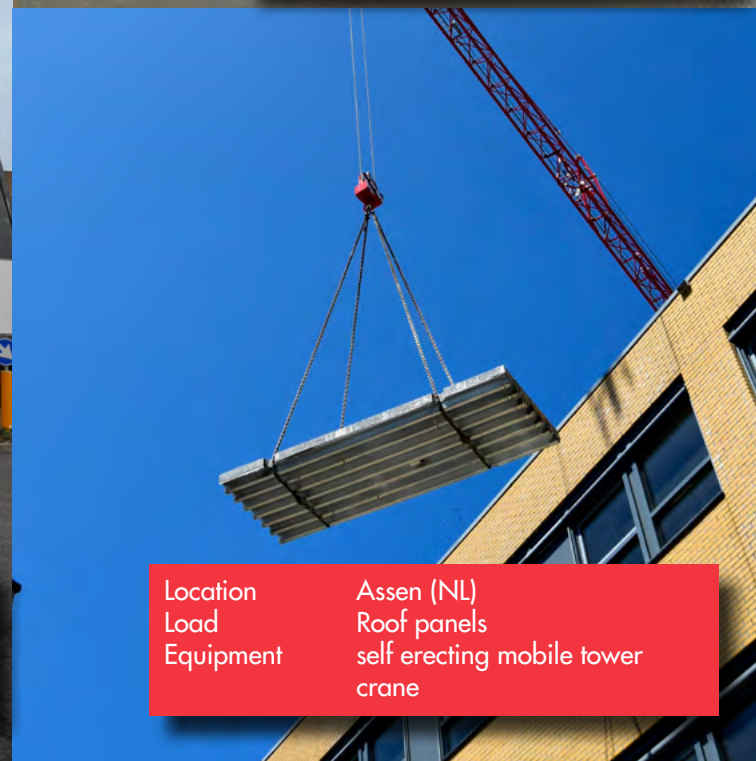

Location Amsterdam (NL)
Load 78 t steel construction
Equipment 2 x 500 t telescopic cranes, 13 trucks, 80 t telescopic crane

HORIZONTAL TRANSPORT

MODULAR TRAILERS AND SPMT
(SELF-PROPELLED MODULAR TRANSPORTER)

Location Utrecht (NL)
Load 45 t bridge deck, Kruisvaartbrug
Equipment 10 axle lines modular trailer, 200/ 500 t telescopic cranes

Location Assen (NL)
Load Roof panels
Equipment self erecting mobile tower crane

VERTICAL TRANSPORT

Telescopic and crawler cranes
HYDRAULIC
LIFTING SYSTEMS
MOBILE TOWER CRANES
